Cochabamba - Bolivia

### ABOUT ME

With three years of experience in software development, I've worked on various types of projects, many of which have been challenging and have helped me grow professionally. However, I'm confident I still have much to learn and that each new challenge presents an opportunity to further refine my skills, contribute more impactful solutions, and become a more well-rounded developer, better prepared for the demands of today's market.

### PROFESSIONAL EXPERIENCE

#### Software developer Courthouse Computers system - Jun 2025 - Apr 2026

I developed sensitive data storage projects for a courthouse. In this project, I was in charge of implementing the frontend system with Angular 19 and Angular CDK to improve functionality. Later, I was also tasked with handling part of the backend using Python and Django. I want to highlight the cooperative spirit of all my colleagues who, whenever I had a block or problem with the code reviews, didn't hesitate to offer support.

#### Software developer Digital Nexus (personal project) - Nov 2025 - Currently

Development of a SaaS application for inventory management and control, point of sale, and reporting, designed to function as a payment service for various companies, branches, and warehouses, using technologies such as TypeScript, Angular 19, Angular CDK, Tailwind, C#, .NET, PostgreSQL, and Docker.

#### Software developer Ende Services and Construction - Mar 2024 - Dec 2024

I was part of a great team developing an enterprise ERP system, implementing a microfrontend and microservices architecture. My work focused on developing a simple, intuitive, and functional user interface while maintaining best practices and adhering to established guidelines. The project was built using Angular 16 along with other libraries such as Primeng and Primeflex. For the backend, Java with its Spring Boot framework was chosen.

#### Software developer Agile soft - Oct 2023 - Dec 2023

I developed a solution for sending bulk electronic invoices via WhatsApp that improved the user experience by allowing them to receive their invoices directly on their mobile devices. It used React, Express, and the WhatsApp Web library to unlock its full potential.

#### Front end Software developer Fun Fit - Mar 2023 - Jul 2023

I developed the user interface for FunFit's ecommerce site, which included authentication, API consumption, Redux handling, CRUD handling, and integration of style libraries.

### EDUCACIÓN

| University of San Simón                  | Oracle next education | Bolivian-American Center |
|------------------------------------------|-----------------------|--------------------------|
| Bachelor's degree in Systems Engineering | Web development       | English                  |
| 2017 - 2024                              | 2023- 2024            | 2024 - Currently         |

#### HARD SKILLS

JavaScript  
Typescript  
Angular  
Angular CDK  
React  
Java  
Springboot  
.Net

#### SOFT SKILLS

Good communication.  
Teamwork.  
Creativity.  
Problem-solving.
